

## LOCATION OF THE LOGISTICAL CENTERS

One of the benefits of our logistics centers is the proximity to the port of Houston. Our rail served storage facility has 21 acres of fully compacted land for outside storage, and the facility is served by the PTRRA railroad. Two private internal tracks capable of handling 50 rail cars are available for loading and unloading clients' cargo 24 hours per day. The facility is located (3) three miles from the port of Houston. The facility is equipped with a 500 ton Gantry system, a 250 ton crane, as well as forklifts to handle cargo of all weights and dimensions.

Our packaging and storage facility, located in Pasadena, Texas, has 40,000 sq ft of warehousing space and is only 10 miles from the port of Houston. The facility provides clients with internal and external packaging solutions. Vehicles fully equipped and managed by well trained professional personnel can pack the cargo at the client's location or in our facility. The company also provides many other services as requested by our clients. The facility provides all the necessary equipment to meet our clients' needs.
